Life to your palm

with GSM PANIC

Do you know whether your parents, relatives or alone-living family members are all right? Don't have them any problems or aren't under stranger attack? Or you need to call them every hour and inform if they are OK?!

Satisfaction
on each side

GSM PANIC

the right choice for your family

When do you need it?

- sudden health problem
- stranger attack
- inability to call somebody by phone

What does it ensure?

- it calls to your relatives and send SMS message
- you can listen to protected area
- two-way communication with using speakers
- it will make emergency call if necessary
- it secures the area

Do not rely that:

- your neighbours are at home at will hear emergency call
- you set up mobile phone whit preset phone numbers
- ambulance will automatically come

Advantages:

- quick start without complicated installation
- easy control
- it works without electricity with backup battery
- portable
